Summary

Software Engineer focused on frontend development using React, Next.js, and TypeScript. Skilled in API integration, state management, responsive design, and performance optimization. Has hands-on experience in backend development using Node.js and Django, as well as UI/UX design.

Education

•Faculty of Engineering, Mansoura University. *Sept 2020 - Jul 2025*

Bachelor's Degree in Computers and Systems Engineering

- **Relevant coursework**: Web development, Database systems, Data sturctures, Algorithms, Networks, Machine learning, Control systems, Embedded systems.

Key Projects

•Reelio | Social Movie Review Platform - GitHub

Web-based social platform for movie reviews and user interaction, built as a single-page application.

- Built reusable and scalable UI using component-based architecture with ShadCN, focusing on design consistency and performance optimization.
- Integrated TMDB API and backend services to deliver dynamic content.
- Implemented efficient state management using Redux Toolkit and RTK Query with optimized caching to reduce API calls.
- Developed robust form handling and validation using React Hook Form and Zod, and integrated Upload-Thing for media uploads.
- **Technologies**: Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit.

•Focus-CRM | Web Application - GitHub **-** Live Demo

Responsive web application focused on Frontend & clean UI.

- Implemented authentication and access control to secure data and routes.
- Built complete CRUD operations for managing records with integrated search functionality.
- Integrated EmailJS for contact form functionality.
- **Technologies**: HTML, CSS, Bootstrap, JavaScript, Django, EmailJS.

•AuthCore | Authentication System - GitHub **-** Live Demo

A full-stack authentication system designed to handle secure user management and authorization.

- Developed a full-stack authentication system with secure workflows (registration, login, logout, account deletion) using JWT-based authorization and Bcrypt hashing.
- Implemented efficient API state management with RTK Query, protected routes with React Router, and added multilingual support using i18next.
- **Technologies**: React.js, Redux Toolkit (RTK Query), Node.js, Express.js, MongoDB.

•Kalima | Landing page - GitHub **-** Live Demo

A responsive, bilingual landing page for a translation agency.

- Built a responsive interface supporting bilingual layouts with localized assets using modular code with SEO-friendly URL handling & Integrated EmailJS for contact form functionality
- **Technologies**: HTML, CSS, JavaScript, EmailJS.

Technical Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS.
Frameworks & Libraries: React, Next.js, Redux, RTk Query, Apollo Client, Django.
UI & Styling: Tailwind CSS, Bootstrap, ShadCN, MUI.
Backend Technologies: Node.js, Express.js, NestJS, MongoDB, GraphQL.
Tools: Git, GitHub, Browser DevTools, Figma, Postman.
Concepts: OOP, Data Structures, Algorithms.

Languages

Arabic: Mother tongue.
English: Conversational.
